

Make some money jars

Here's what you do:

1. Collect 3 empty containers from your household recycling to put your pocket money in. Look for things like jars or large yoghurt containers with lids.
2. Make sure you clean the containers so they don't smell!
3. Print out this label sheet.
4. Decorate the labels and containers with paint or coloured pencils & crayons.
5. Cut out the labels and stick one onto each of your containers.
6. Display your new containers somewhere in your room and start saving today!

If you receive some pocket money, you will need to decide how much money you want to save (maybe you're saving for a new bike), how much you want to spend right away and even how much you might want to donate to a charity.
